History of Publications

Term	Vol.	Title	Published
Jan., 1929- Dec., 1947	1-16	化学研究所講演集 (The Reports of the Institute for Chemical Research)	Indeterminately
April, 1933	—	10 Jahre Institut für chemische Forschung (化学研究所創立十周年記念号)	—
March, 1949- Dec., 1949	17-19	化研講演集 (The Reports of the Institute for Chemical Research)	Indeterminately
March, 1950- Sept., 1952	20-30	化学研究所報告 (Bulletin of the Institute for Chemical Research)	Quarterly
Dec., 1951	—	The Commemoration Volume for the Silver Jubilee (化学研究所創立二十五周年記念号)	—
Jan., 1953 onwards	31 No. 1-	Bulletin of the Institute for Chemical Research (化学研究所報告)	Bi-monthly
Nov., 1966	44 No. 6	Special Issue on the Commemoration of the Fortieth Anniversary (化学研究所創立四十周年記念号)	—
Nov., 1976	54 No. 6	Special Issue on the Commemoration of the Fiftieth Anniversary (化学研究所創立五十周年記念号)	—

小泉直一教授
Professor Dr. Naokazu Koizumi

Emeritus Professor Naokazu Koizumi

On March 31st, 1985, Dr. Naokazu Koizumi retired after having completed 39 years of service at Kyoto University. On the following day, he was honored with the title of Emeritus Professor by the University.

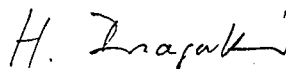

Dr. Koizumi was born in Kyoto on July 12, 1921. He graduated from Kyoto University with a major in chemistry in 1945. In 1946, he joined the Institute for Chemical Research, Kyoto University, and started his studies on the dielectric approach to materials under the supervision of Professor R. Gotoh. In 1953, he was appointed as an associate professor. In October 1958, he was conferred a Doctor of Science by the Ministry of Education for his studies on the dielectric properties of polar liquids in the microwave region. In 1959, he benefitted from spending two years abroad, where he continued his studies at Purdue University, U. S. A. He worked there on the physical properties of organotin compounds and metal carbonyls in co-operation with Professor W. F. Edgell.

In 1961, Dr. Koizumi was promoted to full professorship, in charge of the overall direction of the Laboratory of Dielectrics. He conducted extensive research on the development of the dielectric approach and the related investigations on a variety of materials. He designed and constructed various kinds of research instruments for dielectric measurements such as waveguide and coaxial equipment in a microwave region and a milli-hertz bridge circuit for the very low frequency region. From his experiments with these instruments over a very wide range of frequency, he elucidated a variety of dielectric behavior of pure liquids, solutions, solid polymers and colloidal dispersions. His recent work has been extended to ferroelectric properties of fluorocarbon polymers.

Dr. Koizumi gave lectures on advances in dielectric investigations into electrical properties of matter at the Graduate School of Science, Kyoto University, and he was also in charge of supervising the dissertation work of many graduate students. He also gave lectures on selected topics as well as physical chemistry as a visiting professor at several different universities.

Dr. Koizumi is respected by his students and loved by his colleagues for his amicable, sincere and thoughtful personality.

This collection of papers by his former and present associates as well as his colleagues and students is dedicated to Dr. Koizumi in honor of his long period of sincere service on his retirement.

CONTENTS

Commemoration Issue Dedicated to Professor Naokazu Koizumi on the Occasion of his Retirement

Takeshi Mukoyama and Hirohiko Adachi: Statistical Exchange Parameter and X-Ray Emission Rates	173
Tatsumi Kawaratani, Yasuyuki Nakayama, and Tatsumi Mizogawa: Measurements of Positron Annihilation Rate in Low-Temperature Gaseous Nitrogen	177
Naotake Nakamura, Yukio Yoshimura, and Shin'ichi Yano: Studies of Thermal Expansion and Diffuse Scatterings in the Successive Phase Transitions of Cholesteryl 2, 2, 3, 3-Tetrafluoropropionate (CTFP) by X-ray Diffraction Method.....	186
Yoshio Oka, and Naokazu Koizumi: Formation of Unoriented Form I Poly (vinylidene fluoride) by High-Rate Quenching and its Electrical Properties	192
Kenji Tadano, Shin'ichi Yano, and Yoshio Muroga: Dielectric Relaxation and Molecular Motion of Poly(tert-Butyl Crotonate)	207
Hironobu Kasano, Hiroki Kurata, Takashi Kobayashi, and Natsu Uyeda: An Application of Electron Energy Loss Spectroscopy to the Study of Residual Aluminum in Raney Nickel Catalyst	216
Tetsuya Hanai, Katsuhisa Sekine, and Naokazu Koizumi: Improved Evaluation of Electrical Phase Parameters in a Dielectric Theory for Concentrated Suspensions of Spherical Particles	227
Kozo Iwauchi, Yasunori Ikeda, Naokazu Koizumi, and Yoshichika Bando: Dielectric and Magnetic Relaxations in $\text{BaO} \cdot 2\text{TiO}_2 \cdot 2\text{Fe}_2\text{O}_3$ and $\text{BaO} \cdot 2\text{SnO}_2 \cdot 2\text{Fe}_2\text{O}_3$	241
Yasuo Kita, and Naokazu Koizumi: Dielectric Cell for Deformable Solids	249
Koji Asami, and Akihiko Irimajiri: Does "One-Sphere" System Conform to the Wagner Equation for Simple Binary Dispersions? An Experimental Assessment by Use of a Ball of Glass, Steel or Hydrated Gelatin Suspended in Aqueous Solutions	259
Soichi Hayashi, Kazumi Kurita, Noriyuki Kimura, Junzo Umemura, and Tohru Takenaka: FT-IR Studies on Molecular Structure and Orientation of a Liquid Crystal, 4'-N-octyl-4-cyanobiphenyl	276
Review	
Eiji Ikada: Dielectric Properties of the Oligomers of Chain Polymers	296
